

Prize Plugz Platform Framework

1. Platform Summary

Prize Plugz is a peer-to-peer prize platform that visually mirrors the current design of HitTheRoadJackpot.com but introduces a scalable, automated, and legally compliant giveaway sweepstakes-style system for collectibles and physical goods. Sellers can host games without going live, and players can participate via pay-to-enter draws or a one-time no purchase necessary (NPN) option.

2. Key Features

- Peer-to-peer automated games - no live streaming required
- Seller dashboard to manage multiple listings
- Pay-to-enter model with visible entry stats
- 'No Purchase Necessary' (NPN) one-time button per game for compliance
- Entry countdown and scheduled draw logic
- Buyer profiles to track entries and past games
- Stripe Connect for seller payouts

3. Seller Game Listing Flow

1. Click 'Create Game'
2. Upload prize images/videos
3. Set title, description, category
4. Define price per entry and total number of entries
5. Schedule draw time or allow auto-fill
6. Publish game to marketplace

4. Game Viewer (Buyer Interface)

- Large product display (carousel)
- Entry price and availability
- Countdown timer to auto-draw
- Buttons: 'Enter Game' and 'No Purchase Entry'
- Game terms, seller profile, item details

Prize Plugz Platform Framework

5. Legal Compliance

- No 'free ball' giveaways
- Clear labeling of NPN entry option (one per game)
- No gambling or sweepstakes language
- Terms & Conditions linked on all game pages
- Purchase not required to enter

6. Tech Stack & Design Notes

- Frontend UI based on HitTheRoadJackpot.com with updated logic
- Backend to support automated draw logic, NPN entries, seller/game linking
- Responsive layout for mobile & web
- Retain vibrant, fun style with cleaner card components and seller stats

7. Admin & Monitoring (Optional)

- Game moderation and review queue
- Manual draw override if needed
- Payout tracking and seller history
- Compliance audit log
