

Prize Plugz – Developer Brief

1. Overview

Prize Plugz is a peer-to-peer, video-first marketplace designed to combine the addictive qualities of top apps (TikTok, Whatnot, eBay, Amazon) while removing the need for livestream selling. The platform is vibrant, engaging, and optimized for user retention and purchasing behavior.

2. Core Features

- Home Feed – autoplay product video cards, trending/ending soon filters, bold CTAs.
- Product Detail – large video player, price, bid button, Buy Now option, social proof of recent buyers.
- Seller Dashboard – earnings summary, auto-relist toggle, affiliate push option, simple listing flow.
- Buyer Engagement – loyalty credits wallet, group buy progress bar, mystery buy option.
- Community Clubs – category hubs (Sneakers, Cards, Electronics) with banners, drops, top sellers.
- Payments & Escrow – funds held until ship/scan; refunds for disputes.
- Trust & Safety – KYC for sellers, prohibited items list, automated moderation.

3. User Flows

Buyer Flow: Browse → Search → View Item → Bid/Buy → Checkout → Track Order → Review

Seller Flow: Create Listing → Upload Video/Images → Set Auction/Buy Now → Publish → Fulfill Orders → Payout

Admin Flow: Review Users/Listings → Fraud Detection → Handle Disputes → Manage Payments → Moderate Content

4. Compliance & Safety

- Marketplace model (not sweepstakes or lottery).
- Every purchase guarantees a product (auction = highest bid wins, buy now = instant purchase).
- Escrow & buyer protection built in (refunds if not received, not as described, or damaged).
- App-store safe: compliant with Stripe, Apple, and Google payment systems.
- Age-gated: 18+ users only.

5. Revenue Model & Fees

- Platform takes a 10% fee per transaction (after Stripe/processing).
- Free Tier: Sellers get 5 free postings per month.
- Starter Plan: \$5.99/month for up to 20 postings.
- Pro Plan: \$14.99/month for unlimited postings.

- Additional upsells: featured listings, promoted placement, affiliate boost options.

6. APIs & Data Model (Summary)

Key Endpoints: /listings, /media, /search, /feed, /bid, /checkout, /orders, /payouts, /disputes. Entities: User, Listing, Bid, Order, Shipment, Dispute, Message, PaymentMethod, PayoutAccount.

7. Visual & UI

The UI must be vibrant, modern, and engaging: bold gradients, sticky navigation, video-first design, and addictive layouts inspired by TikTok, Whatnot, and Amazon. Use urgency indicators (timers, progress bars) and social proof (recent buyers, trending tags).
